HAPPY HOLIDAYS

FROM OUR FAMILY, TO
YOU & YOURS,
THE MCCAWLEYS

"The collection of coins has not only become an infatuating and engrossing pursuit among thousands of persons of all ages and either sex, but out of it has grown up an extensive trade, furnishing the means of livelihood to numerous individuals in all our large cities. Prices have risen a hundred fold, in some cases almost incalculably; unreasonably; and speculation has been rife . . .

(from The American Journal of Numismatics, Vol. 1, No. 1, May, 1866.)

OUR TERMS OF SALE

1. All coins are guaranteed genuine. I will replace or issue a refund for any coin found not to be genuine. This is a lifetime guarantee. Over ten years of business I have never had to make good on this promise. But I make it anyway for your protection.

2. All attributions are guaranteed correct. Also a lifetime guarantee. I will issue a refund or if available provide a replacement for any coin found to be mis-attributed.

3. A full thirty day return privilege is allowed on all purchases. Returns may be made for any reason, or for no reason. My business depends on attracting repeat customers. It does neither one of us any good for you to keep a coin with which you are not completely satisfied. I am confident that the overall quality and value of the material I offer here is second to none. This does not mean that you might not order a coin that fails to satisfy your personal taste or desire. It is even possible for me to have missed a defect or to have been optimistic about the grade. It can happen. But it is not my intention. I encourage you to use the thirty days as an approval period. Feel free to show your purchases to other knowledgeable EAC members. Get a second opinion. All sales are final after the thirty day period, though I will certainly consider an extension upon reasonable request.

4. Approval service is also available to established clients. Seven days inspection is allowed on approval service at which time the coin must be returned or funds remitted. Approval sales are considered final after the seven days. Extensions are available upon request. We also accept VISA or MASTERCARD.

5. All orders are sent postpaid.

6. Strict ANA and EAC guidelines are followed in grading.

In addition to strict ANA and EAC guidelines I have introduced "value" or "net" grading into my descriptions. Sharpness or technical grade according to ANA standards is fairly easy to describe with consistency. However most old copper coins have acquired defects over time that detract from the overall desirability of the coin. I describe these defects and deduct from the technical grade based on their presence. As an example a coin might be described: "1805 S-267 VF20. Sharpness of VF30 with smooth brown surfaces, some light pin scratches where corrosion was removed at K1 reverse." Here is a coin VF30 by

ANA standards but with scratches at one o'clock on the reverse. Plainly the coin would be more desirable were the scratches not present. I describe the defects and deduct ten points from the overall grade. The first grade listed represents the net or value grade. Clearly this is an

art and elements of subjectivity are inevitable. Where there is no second grade listed it is my opinion that the net grade is the same as the sharpness grade. Perhaps not perfection but whatever marks present have been judged to be consistent with the technical grade of the coin and do not detract from the net grade. The intent is for you to have as close an idea as possible of the overall condition of the coin you may wish to purchase. No unpleasant surprises!

7. I attempt to give a rarity rating for each variety listed. These in large part reflect the current EAC ratings as compiled in Jack Robinson's Copper Quotes. I also offer opinions relative to condition census ratings, die state, and condition rarity. These change constantly as new coins are discovered and reported. I attempt to use the latest data or information available. Still these ratings cannot be 100% accurate and remain a matter of opinion only. Having said this I can also say with confidence that more information and more research is available on Early Copper than any other area of American Numismatics. Large cents have been actively collected and researched for more than one hundred years. One can therefore have a high degree of confidence in the general accuracy of current information. I urge all my clients to form the numismatic library necessary to allow them to make informed judgements and purchasing decisions. It is foolish to invest money in coins if you have not already invested in the books and other sources necessary to the full enjoyment of them.

8. I have yet to meet anyone who has bought coins merely as an investment who has realized a net return upon liquidation. I have, however, met numerous serious collectors, who having formed a discrimination collection over a period of years realized a substantial profit when their collection was ultimately sold. Most collectors find that the enjoyment, education, and friendships formed as a result of their collecting pursuits have been their greatest reward. It is much easier to lose money quickly than to make money quickly in rare coins. If you are not willing to undertake the educational process necessary to make well informed decisions regarding your collection you will almost certainly lose. Coin dealers are often more than willing to give investment advice. As my good friend Jack Robinson (whose collection did very well for him when it was sold in 1989) likes to say: THINK ABOUT IT! When you ask a cat which canary to buy remember his first concern may not be how well it sings. There are many opportunities to do well financially in rare coins. But as with any other medium of investment, success is the result of a combination of knowledge, good timing and the ability to wait for the right time to sell. Commit yourself to the process of becoming an educated collector and you stand a good chance of success.

1794 S-57 R1 AU50+ \$8750.00
Choice frosty steel brown with smooth, highly lustrous surfaces. There is just a bit of light friction on the highest points and no contact marks. The only defects are some tiny pre-striking planchet chips that didn't completely strike out near the dentils on the upper half of the obverse and at UNITED. In addition, there is a tiny flake out of the planchet, as minted, touching the right side of the 9 in the date. M-LDS with strike doubling on all 4 digits of the date and LIBE, the result of die bounce. A beautiful, well-preserved example that's near the lower end of the condition census. Noyes photo #31709. Acquired in the United States in the early part of the 19th century by Sir Rowland Winn (later Major the Lord St. Oswald, M.C.)-the Oswald descendants-Christie, Manson & Woods, Ltd (London) 2/92:283-Eric Streiner-Superior 10/11/92:69- Anthony Terranova-Roger Siboni-Chris McCawley-Walter Husak.

In addition, there are some tiny pre-striking planchet chips that didn't completely strike out at LIBERT. Glossy dark chocolate and steel with some lighter brown toning on the reverse, which has less gloss than the obverse. EDS, the reverse die uncracked.

1794 S-60 R3+ VF35 \$4500.00
Sharpness at least EF40 with a faint hairline scratch down the cheek and neck, a small rim nick at R in LIBERTY, and a few other minor rim nicks at AM, RI, and the right ribbon end. The rim over AT in STATES is slightly beveled due to an incomplete planchet in that area. Glossy steel brown and chocolate with a few very fine striations of reddish brown across the reverse, the result of some impurities in the planchet. While the description details many minor imperfections on this cent, it is actually quite attractive and has nice eye appeal for the grade. MDS, the obverse clashmarks and die cracks clear. Tied for CC#7. Noyes photo #28419. Ex. Tom Morley.

1794 S-61 R4 XF45 net \$9850.00
Sharpness near AU55 but nicely recolored glossy medium steel brown with some bluish steel overtones, especially on the reverse. There is a minor rim bruise left of the L in LIBERTY, a thin nick in the field under the cap, and a faint hairline scratch down the neck. A tiny fissure in the planchet barely affects the dentils under the fraction. The rim is very slightly beveled at the I in AMERICA and E in LIBERTY, the result of a marginally incomplete planchet in those areas. Tied for CC#7. Noyes photo #29981. The obverse and reverse are plated in the 1910 Elder-Gilbert book and the Chapman book. A sharp, attractive cent in spite of the minor distractions, and it comes with an outstanding pedigree. Ex. E. FINEST KNOWN LATE DIE STATE 1855 N-4

1855 N-4 R1 MS63 \$1650.00
Lustrous light steel brown with about 25% of the original mint red remaining, although it has faded down a bit. There are a couple tiny nicks or pre-striking planchet chips on the obverse rim and a tiny spot of darker toning in the field right of the inner curl. LDS with a series of 4 rim cud breaks over STATES plus a strong die crack outlining the final rim cud (which has not yet formed) over OF. The cuds are bold on this example, which is not always the case, even on high grade pieces. Tied for CC#1 of about two dozen known with these cud breaks.

1855 N-5 R5+ VF30+ \$ 175.00
Five points sharper with a few marks on the reverse rim. Glossy light steel brown with darker steel toning on the highpoints. MDS.

1855 N-10 R1 MS63 \$ 475.00
Frosty steel brown with 30% faded mint red. There are two small spots of darker toning in the hair under star 7, a small flake out of the planchet on the bottom edge of the bust over the 8, and a thin nick right of star 6. Sharp E-MDS.

1855 N-10 R1 MS63 \$ 750.00
12-STAR OBVERSE. Lustrous light steel brown with about 25% of the mint red remaining. The surfaces are free of any contact marks, but there is a tiny void on the rim, as minted, at the F in OF. In addition, there are some tiny carbon spots at the dentils under the date. EDS, struck before the proofs of this variety, with star 6 very weak from a clogged die, the so-called 12-star obverse. The fields are slightly prooflike. An attractive example of this popular die state.

THE COLONIAL COIN COLLECTOR'S CLUB SALE

The fourth annual Colonial Coin Collector's Club Convention was held the third week in November in conjunction with the Baystate Coin Show. The night of Nov. 21st we held our fourth sale for the club. It was again a success with a net prices realized of over a quarter million dollars!

I'm still in the process of sorting out these Colonial Sales. Each year I am more surprised than the last. This year's featured attraction was a nice group of 1781 and 1785 imitation British halfpence. These two dates have an association with coins circulating in the colonies. And could conceivably been specifically minted for use in the colonies. Prior to this sale it was unclear (at least to me) whether these coins would bring several hundred dollars each or several hundred cents.

There were other significant offerings. Some nice Massachusetts silver and an important collection of Connecticut coppers. There were a couple nice New Jerseys too.

This was our first year using Bob Abbott as auctioneer. For all our past sales we had used Jack Robinson, but this year Jack was in Singapore selling ozone. (I swear this is true!) We briefly considered having him call the sale by phone, but Dennis Wierzbowski found us Bob for which I am very thankful. The sale opened with Massachusetts silver. Lot five, a very nice AU Pine Tree Shilling NOE 10, opened at \$5500 to the book, then was actively bid up to \$10,000. The last bid was to the book at \$10,250; then the auctioneer accepted a floor bid of \$10,350. I winced imagining a very irate mail bidder losing a \$10,000 coin for an \$100 increment. I very briefly wished Jack Robinson could have sold his ozone closer to home. But then the bidding continued and the lot sold to the floor for \$11,000. Not a bad start.

Sometime later the proof 1723 Woods Halfpenny sold for \$1700. It takes some kind of Woods Halfpenny for me to get enthused, but I thought this was a beautiful coin. A great run of Connecticut cuts started out strong as lot 99, a nice F12 1785 M.6.4-k,

brought a hammer of \$1200. Then a few lots later, the beautiful 1787 M.5P (I thought undergraded at EF45) brought a very strong \$6200. Two lots later lot #120, the 1787 M.8-N AU50, brought \$2800. There were a great many "four figure" Connecticut cuts, many run up from modest openings. We had, I thought, a pretty active book, but it didn't win many of these. For instance, lot 210 opened at a reasonable, I thought, \$925. It advanced quickly over the book high (about \$1600), finally going to an eastern collector at \$6500.

A very pretty M.15-J New Jersey brought \$4500. Then came the M.57-N New Jersey VF20 and one of the finest known of this rare variety. It had come to us in a group of coins where it had been purchased for \$350. The consignor had it correctly attributed. But I will say I think he was very happy as it opened at \$4250, quickly sped to \$10,000, and then was battled out in \$500 increments to a final hammer price of \$15,000.

The imitation British Halfpence? Well, the first one, a beautiful mint state 1781 Newman 40-81A brought \$2200! (See I was wrong again: neither several hundred dollars nor several hundred cents!) Likewise lot 418, the mint state 44-81E brought \$2200. The circulated 1785s I thought brought strong prices also. These pieces have been argued to have been made for their circulation in the colonies and brought prices ranging from \$475 for the F12 51-85C to \$750 for the VF 51-85B and \$1000 for the 52-85A. Another of the highlights of the sale for me was lot #452, the VF Northwest Company Token. This was the first attractive "Beaver" token I have seen in several years. It brought a strong \$4000.

Well, complete prices realized follow. If you failed to get a copy of the catalog, they can be ordered for \$15 soft cover (from me) or \$50 hard cover copies will be available in a few weeks.

We look forward to next year.

Chris
